Instructions have been issued vide Circular referred to at Sl.No.1 about the classification of roads and adopting uniform running time.

In view of constant increase in cost of vehicles and also the staff cost, it is necessary that these assets are utilised to the maximum extent possible so as to achieve the economy in operation by increasing the vehicle and crew utilisation.

Running time is an important factor of vehicle and crew utilisation. After a detailed study of the different road surfaces and advancement in automobile technology the running time is revised for the different type of road surfaces and category of services operated, as follows.

- 2 -

Sl. No.	Type of road surface	Congested Road Sector		Free Road Sector	
		Exp. KM/PH	Ord. KM/PH	Exp. KM./PH	Ord. KM./PH
1.	Cement concrete and black topped Road	45	35	55	45
2.	Good Metal (Macadam) and black topped Road.	-	-	50	40
3.	Bad Metal Road	-	-	35	30
4.	Katcha Road	-	-	-	30

With the rationalisation of the running time, it will be necessary to re-frame the time-tables as also vehicle duty schedules. The Unit Heads and the Dy. Chief Traffic Managers of the Regions should immediately undertake this work and complete this by 30th June 92 positively.

Receipt of this Circular be acknowledged and compliance reported.
